**Re: Data Center Site Certification – Quantico Corporate Center
Stafford County, VA**

Dear Kent:

Thank you for the opportunity to work with Dominion Virginia Power on the Data Center Site Certification program. Please be advised that we have reviewed all the information submitted by Stafford County and The Silver Companies for the Quantico Corporate Center to be certified under this program. After a thorough review of the information, we are pleased to certify the Quantico Corporate Center site as a Dominion Data Center Certified site! In particular, we are exclusively certifying Parcels D1 and F for this site for a period of 12 months from the date of this letter.

The certified site program evaluates 31 stringent criteria related to infrastructure and site development along with several risk factors associated with data center development such that a certified data center site can be up and running within approximately 12 months after project announcement. The program also is designed to certify sites that help minimize the 20-yr TCO (total cost of ownership) for a data center user.

Quantico Corporate Center is a robust development with an excellent location just off of I-95 at the entrance to Quantico Marine Corps Base. We believe the site will be an excellent fit in the Data Center Site Certification program, especially given the access to Summit IG's dark fiber and regional network and Quantico's proximity to Washington DC.

It has been a pleasure working with Stafford County, Dominion, Summit IG and The Silver Companies on this site certification program. We look forward to further working with our valued partners to help the Quantico Corporate Center site fulfill its potential with a data center.

Should you have any questions, or need any additional information, please don't hesitate to contact me at your earliest convenience.

Sincerely,

Joseph C. Hines, PE, MBA
Principal
